What the Data Tells Us - School Climate Surveys and Other Data

As part of the on-going monitoring and evaluation process, schools gather data from a various of sources, including school climate surveys of students, staff and parents every two years. Our school data indicates the following:

STRENGTHS

From the 2018 School Climate survey for students:

- 79% of our students reported feeling safe at school
- 69% of our students reported feeling that they belong
- 82% of those students who felt they were bullied told someone about it
- 91% of our students know how to report bullying at school
- 53% of students report never having bullied others at school

Based on the analysis of various sources of data, our school has identified specific bullying prevention and intervention goal statements for this school year. These goal statements will drive our actions for this year. Outcomes will be monitored and assessed using a continuous improvement cycle.
